**Note:** If you cannot access websites outside of the ECU domain, you will need to check your proxy settings and confirm they are set to “**Automatically Detect Settings**”.

To configure proxy settings for:

**Internet Explorer:**

Open Internet Explorer and click **Tools > Internet Options > Connections > LAN Settings**. Tick the box labelled “**Automatically Detect Settings**”. Click OK to all open windows and try browsing a website. Click here for detailed IE instructions.

**Firefox:**

Open Firefox and click **Tools > Options > Advanced > Network > Settings** > and tick the box labelled “**Auto-detect proxy settings for this network**”. Click OK to all open windows and try browsing a website.
