

Enforced Changing of Computer Passwords

It was highlighted in a report from the Office of the Auditor General that staff and students must be required to change passwords in line with the University Information Security Policy. This policy requires passwords be set to expire unless changed by students and staff every 90 days.

Commencing Monday 31 March 2008, a process for implementing this Audit recommendation will commence for students. This will mean that all students will have to change their password via the Central Authentication System (CAS) (<https://www.ecu.edu.au/apps/mylogin/>) every 90 days.

Students who fail to reset their password will not be able to logon until they contact the IT Service Desk (on 6304 6000) to have their password reset. Once the IT Service Desk have reset the password, students will have until midnight that day to login and change their password which will be valid for a further 90 days.
