Corporate Express is committed to working with our customers to maintain and preserve the earth's natural resources. By raising environmental awareness, offering alternative products and developing programs to reduce waste, we aim to incorporate environmentally responsible activities into our daily lives.

'EarthSaver' Products

As part of our environmental focus, we encourage the selection of recycled, re-manufactured and environmentally sensitive products. We have developed the EarthSaver logo to assist our customers in identifying products that meet the following criteria:

- Products that contain a specific percentage of recycled materials in the original manufacture
- Products that are manufactured using environmentally friendly practices and procedures
- Products that do not harm or denigrate the environment while in use
- Products that, when they reach the end of their life, are specifically environmentally friendly (e.g.: biodegradable)

The Corporate Express EarthSaver product range includes:

- Laser/Copy Paper
- Remanufactured Toner Cartridges
- Writing Pads
- Post-It Notes
- Envelopes
- Computer Cleaning Products
- General Stationery
- Markers and Highlighters

Some of our key EarthSaver products are featured on the following pages. For further information, please refer to the EarthSaver index at the back of this catalogue or contact your Corporate Express representative on 13 26 44 for a full EarthSaver listing.

ment to the **environment**

GreenXpress

Corporate Express recognises that environmental and social management programs are among the highest corporate priorities. This belief has led to the formation of GreenXpress, our environmental management committee. The committee's members include key staff from the supply, sales & marketing, quality, risk management, legal and finance sectors of the business.

The committee has been charged with developing an Environmental Management System based on the international standard ISO 14001, as well as realising objectives and targets already set in our environmental policy. The committee is also involved in environmental and social considerations in strategic decision making.

www.brba.com.au

Buy Recycled Business Alliance

Corporate Express joined the Buy Recycled Business Alliance (BRBA) as a foundation member in 2001.

The BRBA is a business based non-profit organisation which promotes the purchase and use of recycled content products (RCP's) and materials through leadership by example, education and information, research & development and partnerships. The objectives of the BRBA include:

- To facilitate the increased purchase and use of RCP's by Australian business
- To increase understanding of the availability, quality and value of RCP's and materials
- To demonstrate that 'buying recycled' contributes to sustainability via market forces
- To improve Australia's recycling system through greater demand for collected recyclable materials
- To provide members with information, representation, relationships and profiting opportunities related to the 'buy recycled' concept

Corporate Express fully supports the initiatives of the BRBA and we are currently implementing programs with our staff, customers and suppliers to promote recycling and the sale of recycled products.

Greenfleet

Corporate Express is proud to be a member of Greenfleet Australia, a not-for-profit organisation that specialises in reducing the environmental impacts of transport by planting native trees to offset CO₂ emissions.

For each vehicle Corporate Express operates nationally, a fee is paid by us to enable Greenfleet to plant trees that will offset the emissions from those vehicles.

For further information about Corporate Express' environmental focus and company initiatives, please refer to our website www.ce.com.au or contact your Corporate Express representative on 13 26 44.

Sustainable Development isn't just about the environment...

EXP Green Toner Cartridges have been developed to provide you with an environmentally sustainable and economical printing solution that meets your print quality expectations.

Sustainable Development
n. economic development designed to meet present needs while also taking into account future costs, including costs to the environment and depletion of natural resources.

- Macquarie Concise Dictionary

EXP Green Toner Cartridges:

- are manufactured in Australia using quality recycled and new components
- are manufactured using premium grade toner to ensure that stated page yields are achieved without compromising output quality
- are individually tested to ensure the highest print quality and page yields
- are covered by Corporate Express' warranty that covers not only the toner cartridge but also the printing equipment
- are packaged in cartons made from 100% recycled board that is 100% recyclable after use
- use up to 20 times less energy to produce than new toner cartridges
- save up to three litres of oil, the typical volume of oil required to manufacture a new toner cartridge!
- reduce the estimated three million toner cartridges imported into Australia each year, most of which end up in Australian landfills

An economically sound and environmentally sustainable alternative supporting re-use, recycling and reduction of waste without compromising print quality or output.

toner cartridges

EXP Green Toner Cartridges

EXP Green toner cartridges provide a high quality printing solution, using a cartridge that is **produced with environmental issues in mind**. EXP Green toner cartridges are manufactured in Australia using **quality new and recycled components**. Each cartridge is manufactured with a **new drum unit and premium grade toner** to ensure that stated page yields are achieved **without compromising output quality**.

All EXP Green toner cartridges are tested individually to ensure highest quality. The **EXP Green toner packaging is made with recycled board and all components, including the packaging are recyclable**.

If you require a competitive and environmentally conscious alternative for printing that supports reuse and recycling, without compromising quality, EXP Green toner cartridges will provide the solution.

- All page yields are based on 5% coverage of an A4 page

did you know?

- About 30% of toner cartridges used by Australian businesses are recycled and the remaining 1.8 million approximately a year, end up as landfill
- Toner cartridges take between 500-1000 years to decompose in landfill.
- In 2004, Corporate Express collected and returned over 120,000 toner cartridges to The Recycling Centre!

Corporate Express Australia

Toner Recycling Program

As part of our commitment to the recycling process, Corporate Express has developed a Toner Cartridge Collection Program that facilitates the return of used toner cartridges, to be used in the remanufacturing process. The Corporate Express Toner Recycling Program is an environmental initiative that has gained Corporate Express a reputation as one of the major sources of used toner cartridges being returned to recycling centres.

The Corporate Express Toner Cartridge Collection Program incorporates the collection of used cartridges and the process of returning these cartridges to a recycling centre. Some cartridges may also qualify for a specific rebate paid directly by The Recycling Centre.

Details of applicable cartridges and the rebate amounts are available from your Corporate Express representative, or from The Recycling Centre on **1800 628 854**.

How this program operates:

1. Order a Used Cartridge Collection Carton from Corporate Express with your next order. Our Re-Order code is 86661340. This is a no-charge item.
2. Use the carton to store your empty cartridges.
3. Once you have a minimum of 10 empty cartridges, call The Recycling Centre (Toll-Free on **1800 628 854**) to arrange collection.
4. Your used cartridges will be collected and returned to The Recycling Centre at no cost to you.

For further information about this program, please contact your **Corporate Express** representative on **13 26 44**.

Warning: The business of collecting empty toner cartridges for remanufacturing is becoming increasingly competitive. We have been informed that some engaged in this process, practice unethical and misleading methods of cartridge collection, including falsely claiming a portion of the benefits from cartridges collected will be donated to charity or used to fund job creation schemes. There are of course other legitimate collectors who do donate proceeds to various worthy causes. If you are in doubt as to the claims made by, or authenticity of, anyone representing a collection company, ask for suitable identification before admitting access, or please contact us.

laser toner cartridges

RTS Remanufactured Laser Toner Cartridges

Not all cartridges are created equal!

RTS remanufactured cartridges have components that are electronically tested to ensure that print quality and lifecycle of the cartridge will be attained.

Each cartridge after remanufacturing is also print tested to ensure quality control. RTS Imaging is the largest remanufacturer of toner cartridges in the Southern Hemisphere.

Benefits of using an RTS remanufactured toner cartridge:

- Lower page printing costs
- Contribution to the recycling process
- Cartridge and hardware are covered by the cartridge manufacturer's warranty

Warranty information

The use of a remanufactured cartridge in your printer will not void the printer hardware warranty.

If in the unlikely event it is proven that the cartridge has caused damage to the printer, RTS has a limited warranty programme that covers both the cartridge and printer, in case any problems occur.

RTS Remanufactured toner cartridges are available to suit the following models

Introducing the
EXP Green Range

Balancing Your Responsibility...

Purchasing office supplies in today's business environment is a balancing act. At times it feels impossible to balance your environmental responsibility, with product quality & reliability.

To help you do this, we have created the EXP Green Range.

*Quality without
Environmental Compromise...*

All products in the EXP Green Range are high quality, reliable and manufactured to minimise the impact they have on the environment through the use of recycled materials and/or environmentally friendly manufacture and/or are biodegradable or recyclable at the end of their life.

The EXP Green Range includes:

- Laser / Copy Paper
- Toner Cartridges
- Writing Pads
- Markers & Highlighters
- Toilet Tissue

All EXP Green products include Corporate Express' lifetime warranty.

office environment cleaners

EXP739 Large Absorbent Wipes

Highly absorbent and low lint, these large absorbent wipes are very strong, yet very soft. Made from an A grade non-woven material, these large wipes are 20% bigger than others in the market and are suitable for use with any and all liquid and foam cleaners. Supplied in a pack of 50 in a resealable bag to prevent contamination

86756939 EXP739 Large Absorbent Wipes Pkt 50 Pkt

EXP730 All Purpose Surface Wipes

Suitable for use on screens, hard surfaces and telephones, these wipes are packed in a handy, resealable, flip-top tub of 100. Not only do these wipes remove grease and grime from all surfaces but they also reduce the build-up of dirt on screens which in turn helps to prevent eye strain which can cause headaches. These anti-static, pre-dosed wipes are biodegradable and skin safe.

86756940 EXP730 All Purpose Surface Wipes Tub 100 Pkt

EXP738 Telephone and Surface Cleaning Wipes

100 individual pre-dosed wipes in individual sachets which will clean and sanitise not only all parts of your telephone but also most desk surfaces. The bactericidal formula has a fresh citrus aroma that is safe on all ABS plastics and coloured phones.

86756938 EXP738 Telephone and Surface Cleaning Wipes Box 100 Sachets Box

EXP736 Foam Cleaner for Whiteboards and Hard Surfaces

This cleaning foam has an anti-bactericidal, non-flammable, high foam formula which will not run, making it ideal for whiteboards and all hard, non-absorbent surfaces. The foam content will break down grease and grime while being friendly to the environment with its CFC-free aerosol. 400ml can. Use with EXP739 large absorbent wipes (86756939).

86756936 EXP736 Foam Cleaner for Whiteboards and Hard Surfaces 400ml Ea

EXP733 Pressurised Air Duster

CFC-free aerosol in a 350ml can. Designed to remove dirt and debris from sensitive and inaccessible areas such as between keyboard keys, throughout laptops, drives and inside drawers. Supplied with an extension tube to direct air to those really hard to get at areas. Non-flammable formula.

86756933 EXP733 Pressurised Air Duster 350ml Ea

EXP737 CD/DVD Lens Cleaner

This handy cleaning kit contains all that you need to clean CD and DVD drives. The CD lens cleaner removes contaminants and dirt from CD and DVD drives. This preventative maintenance helps to prevent errors when recording and reading data. Full instructions included. Large absorbent wipes also included to help clean your computer surfaces at the same time.

86756937 EXP737 CD/DVD Lens Cleaner Ea

EXP731 Non-Alcohol Wet and Dry Screen Wipes

Safe on screens (computer, TV, display and PDA) as well as glasses, laptops, touch screens and flat screens. These wipes are supplied in 20 pairs of sachets in a handy dispenser box. The non-alcohol, anti-static formula is safe on skin as well. Simply wipe the pre-dosed wipe on the screen to remove finger marks, grime and grease, and then wipe dry with the dry wipe.

86756941 EXP731 Wet and Dry Screen Wipes Non-Alcohol Box 20 Dual Sachets Box

EXP732 Wet Screen Wipes

Safe on all screens and glasses, these wipes are supplied in a box of 100 individual sachets – for 100 cleans! The anti-static formula is safe on skin, while removing finger marks, grease and grime while also reducing the build-up of dirt and dust on screens. This in turn helps to reduce eye strain that can cause headaches. Simply use one wipe to clean your screen each time – no need to wipe off.

86756932 EXP732 Wet Screen Wipes Box 100 Sachets Box

EXP745 Screen Protector

EXP745 screen protector is perfect for cleaning and protecting your PDA screen.

Recyclable Board Hot & Cold Cups

The manufacturer of these cups observes sound environment practices at all plants maximizing the re-use and recycling of material packaging, safe disposal of waste and waste minimization through all processes.

- Hot and cold drink cups have a low-density polyethylene coating. For cold cups the poly content is 10% of the product material, whereas hot cups contain 8% poly. Ripple-wrap cups have a lower percentage poly content than unwrapped cups, being about 7%
- The majority of glues used on paper products and paperboard products are water-based and all adhesives used by producer are biodegradable.
- The majority of inks used on paper products and cups are water-soluble. All of the inks used are biodegradable.
- 93% of a Ripple-Wrap Cup is fully biodegradable in landfill as the board and paper is essentially composed of cellulose fibres and clay. The polyethylene component becomes embrittled in time and breaks down to small pieces.
- By incineration, Poly-coated board does not produce toxic fumes or dioxins, only water and vapour and carbon dioxide.

Kimberly-Clark Scott® Washroom Products

These Kimberly-Clark products are made in Australia without using a bleaching process. In fact, even Kimberly-Clark products which are bleached (for greater strength, absorbency, whiteness and purity) use a process involving hydrogen peroxide - a process which only creates small levels of by-products which are similar to the natural breakdown of wood. It has no adverse environmental impact. All Kimberly-Clark Australian-made paper products are made from fully sustainable forests - 75% comes from the plantation pine alone. For more in the Kimberly-Clark Range turn to the 'Janitorial and Washroom' section of this catalogue.

Energy Saving Light Bulbs

Use only one quarter of the energy of standard bulbs. When used in high-use fittings, will provide best savings of energy and cost. They cost a little more but any extra costs are easily recouped over the life of the bulb. For more lighting and bulbs, please turn to the 'Office Environment' section of this catalogue.
