Connecting eduroam Wireless using Windows 7/10 or Mac OS X

Information

There are three wireless networks on campus which give you access to the ECU website, the staff intranet, the internet and other ECU resources:

<table>
<thead>
<tr>
<th>ECU</th>
<th>This is the easiest to use and safest wireless network as it sends data over an encrypted network. Once connected to the ECU wireless network with your ECU login ID and password, you can access the internet and intranet.</th>
</tr>
</thead>
<tbody>
<tr>
<td>eduroam</td>
<td>This wireless network can be used by visitors from other educational institutions to connect to the internet whilst on campus.</td>
</tr>
</tbody>
</table>

The following guide will provide instructions on how to connect to the ECU Wireless network, while you’re on campus.

To check which Windows operating system you’re running?

- Check for operating system information in Windows 7
  Click the Start button, type winver in the search box, and then press Enter.

- Check for operating system information in Windows 10
  In the Search box, type winver, and then press Enter.

Installation Instructions

- Microsoft Windows 7
- Microsoft Windows 10
- Mac OS X
Windows 7

1. Check to confirm that your operating system is Windows 7
   In the Search box, type `winver`, and then press Enter.

2. Click on Start, and then click Control Panel.

3. Click on Network and Internet. Please Note – Ensure View by is set to Category.
4. Click **Network and Sharing Center**.

5. Click on **Connect to a network**. **Please Note** - Ensure that your wireless adapter is switched on.
6. Tick **Connect automatically**, and then click **Connect**.

7. Enter your **username** and **password**, and then click **OK**.

8. A Windows Security Alert will appear, click **Connect**.

9. When you see this icon at the bottom-right corner of your toolbar, it means you are already connected to the network.

10. Once you have been connected, you will need to connect to the ECU VPN before you will be able to browse to external web-pages.
Windows 10

1. Check to confirm that your operating system is Windows 10
   In the Search box, type `winver`, and then press `Enter`.

2. For the next step, click on the wireless adapter icon.
3. After clicking on the **wireless icon** the following screen will appear:
4. Select the **ECU (Secured)** option and click on **Connect**.
5. Enter **user name and password** and click OK.
6. If you expect to find the ECU network in this location go ahead and Connect otherwise it may be a different network with the same name.
7. You are now **Connected to ECU Wireless**.
Mac OS X

1. Click the Wi-Fi icon and select the eduroam (SSID) wireless network.

2. Enter your **username** and **password**, tick **Remember this network** and then click **Join**.
   Please note: Your eduroam login ID is your ECU username with @ecu.edu.au at the end.

3. When you see this icon at the upper-right corner of your toolbar, it means you are already connected to the network.

4. Once you have been connected, you will need to connect to the ECU VPN before you will be able to browse to external web-pages.

Tip: Connecting on an ECU Laptop on-campus.
If you're connecting on an ECU laptop on-campus, you will not be prompted for your ADS username and password.
