

Introducing the Better Together Platform

A MARS initiative to track and improve psychosocial safety and wellbeing at work.

Workplaces have a growing responsibility to protect their people from psychosocial risks. However, to make meaningful progress, organisations need the right tools.

The Better Together Platform is a digital tool that helps mining workplaces understand and improve their teams' psychosocial safety. It captures site- and team-level data, tracks changes over time, and benchmarks results against the wider industry.

Based on what your teams report, the platform provides simple, targeted recommendations to improve performance and create a healthier, more respectful work culture.

With the Better Together Platform, you can:

- Measure psychosocial safety and wellbeing at your site(s)
- Compare results across teams
- Benchmark against the broader mining industry
- Get tailored recommendations to control psychosocial risks
- Track progress over time
- Celebrate progress with the Better Together badges

The Better Together Platform is developed by the ECU Mental Awareness, Respect and Safety (MARS) Centre and funded by the WA Government's MARS Program.

The Platform is provided free to the WA mining sector.
