

# LAW ASSEMBLY

## INFORMATION SECURITY – INTERPRETING THE LEGAL CHALLENGES

ECU's School of Business and Law invites you to attend the Law Assembly, a forum to engage in a collaborative dialogue on Information Security.

Information security risks are increasing in frequency and impact due to technology pervasion in society – one that will continually rise. Hyper-connectivity introduces threats and awakens vulnerabilities. Given the dominance of technology, and the risks associated with its use, protection of information and associated assets become imperative.

The promulgation of laws relating to the scope of systems, electronic devices and data networks, highlight the importance of implementing large-scale regulatory frameworks to reduce security breaches and IT crimes.

This year's Law Assembly aims to peek at some of the significant legislation and challenges facing global netizens.
