Improving Team Skills to Manage the Deteriorating Patient in ED

Course outline

Improving team skills to manage the deteriorating patient in the Emergency Department (formerly - Emergency Medicine Crisis Resource Management [EMCRM]) course is designed for both Emergency Department (ED) doctors and nurses. The course aims to improve teamwork behaviours in critical incidents by introducing participants to the key points of CRM and allowing them to practice these points in simulated scenarios. All scenarios are videotaped to allow specific team behaviours to be highlighted in the debriefing sessions that follow each scenario. Importantly, the course is not a ‘test’ of one’s ability to deal with a given crisis or memorise a particular algorithm. Rather, it is a forum for discussion about strategies that aid in the translation of knowledge of what needs to be done with regards to effective management of the situation.

Course duration

This course runs over one day.

Location

ECU Health Simulation Centre, Level 3, Building 21. Please refer to our website for a campus map.

Dates

24 July
21 August

Cost (incl GST)

$440 WA Dept of Health Employees
$800 Other
