

# ECU Adult Speech Pathology Clinic

We offer free services for adults who have difficulty with their speech, language, reading, writing, social communication skills, voice or swallowing after an acquired brain injury.

Third and fourth year speech pathology students work under the supervision of a qualified speech pathologist.

#### Our Services

- Communication and swallowing assessment & treatment
- Individual and group therapy
- Communication partner training and education
- Support for independent communication
- Client-centred, evidence based and goal focussed services
