PERIPHERAL VENOUS ACCESS CANNULATION WORKSHOP

This basic vascular access cannulation workshop is designed for nurses who intend to perform peripheral venous vascular access cannulations on patients with the purpose to either withdraw venous bloods (blood sampling) and/or to insert a peripheral intravenous catheter (PIVC) to establish a vascular access pathway for intravenous fluid supply in a fluid depleted patient or for the administration of intravenous medication.

This workshop is designed for nurses or other healthcare professionals with minimal or no previous experience in vascular access cannulation.

Workshop Format – 4 CPD hours

- UNDERSTAND - Interactive lecture | 1 hour
- OBSERVE - Simulated demonstration | 1 hour
- PRACTICE - Hands-on practical training | 2 hours

Leading the workshop

Dr. Ulrich Steinwandel is a Lecturer at ECU's School of Nursing and Midwifery and has over 20 years of work experience as a clinical nurse in various hemodialysis clinics in Europe and Australia. Ulrich is involved in clinical education at an undergraduate and postgraduate level for nursing at the School of Nursing and Midwifery and is also a member of the European Dialysis and Transplant Nurses Association and the Renal Society of Australasia.

He is also a research scholar and has published multiple articles in peer-reviewed international medical and nursing journals and has also previously presented his research at national and international conferences.
